Derwent Abstract (DE19605788C) The roughing machine, with segments (4) on an roughing roller (1), has the segments (4) arranged on spiral rows (8) on the roller (1) surface. The spirals are structured to run from the centre (6) of the roller with opposing pitches to the roller ends (7). The segments can be tufts of bristles (4) or emery pads.
Use - For contacting tensed fabric by being passed, pref. a pile fabric, to increase the hair feel to give a peach skin effect.
Advantage - The roller gives an effective fabric surface roughing action, without forming stripes on the fabric surface.
